

**SPA · UTOPIA™**  
& SALON

*Dear valued Guest;*

*This winter there is the possibility that some of our Staff and/or Guests may become infected with the H1N1 flu virus. At Spa Utopia our priority is to ensure that all measures are taken to limit the potential spread of the virus.*

*You can be sure that at all times our sanitization procedures used in all of our treatments, services and service areas, meets and exceeds the standards set out by the Health Board.*

*The personal hygiene and health of our staff is a year round priority. We have provided our staff with a pro-active plan and fact sheet about staying healthy, staying home if they are sick, and knowing the symptoms of H1N1 and the difference between the common cold.*

*Our customary greeting of a warm handshake will not be extended at this time to ensure your comfort level when you enter our spa.*

*We wish you a healthy and happy winter season!*

*Warmest Regards,*

*Awni Abu-Ulba*

*Spa Utopia President and Director*
